

## Analysis of Coronavirus Supplement Recipients, 5 May 2021

The Federal Government replaced the \$75 per week Coronavirus Supplement with a \$25 per week permanent increase from 1 April, meaning they are \$50 per week worse off<sup>1</sup>. This has plunged up to 3 million Australians, including over 1 million children, into deeper poverty, with the majority of adult recipients being women. The Government has missed an historic opportunity to right the wrong of children growing up in poverty and consigned far too many Australians to a shocking struggle to put food on their table, pay their rent and search for work. As one of the wealthiest nations in the world, we can and must protect those most vulnerable. It's simply the right thing to do.

### Revised payments from 1 April 2021 are well below the poverty line

- Even with full rent assistance and energy supplement, a single person now receives a maximum of \$54 a day, \$11 a day below the poverty line of \$65 for a single person. In Australia, the poverty line is generally defined as 50% of median household income.<sup>2</sup> Before deducting housing costs, in 2017-18 this was \$457 a week for a single adult (**\$65 a day**); \$731 for a sole parent with two children (\$104 a day); or \$960 for a couple with two children (\$137 a day).

Assume single, no dependents, renting privately	<u>Max Weekly amount from 1/1-31/3/21</u>	Max Weekly amount with \$25 per week from 1/4/21	Age Pension Single	Full-time JobKeeper to 28/3/21
JobSeeker Payment	\$282.85	\$282.85	\$430.30	\$500
Rent Assistance (if paying at least \$155.37 rent pw)	\$69.80	\$69.80	\$69.80	
Energy Supplement	\$4.40	\$4.40	\$7.05	
Pension Supplement (max)	\$0	\$0	\$34.80	
<b>Total without Coronavirus Supplement</b>	<b>\$357.05</b>	<b>\$357.05</b>	<b>\$541.95</b>	
Coronavirus Supplement /Permanent increase	\$75.00	\$25.00	n/a	
<b>Total with Coronavirus Supplement/Permanent increase</b>	<b>\$432.05</b>	<b>\$382.05</b>	<b>\$541.95</b>	<b>\$500</b>
<b>Daily rate</b>	<b>\$61</b>	<b>\$54</b>	<b>\$77.42</b>	<b>\$71.43</b>

- The National Council of Single Mothers & Their Children as part of their **550 Reasons to Smile** campaign September 2020 survey found 94% of respondents said it was either critical (76.5%) or very important (17.5%) to keep the Coronavirus Supplement of \$550 per fortnight. CEO Terese Edwards said: *“the supplement is helping women get the bond together to leave a situation of domestic violence, buy a family computer so kids can home school, put healthy food on the table three times a day and make it possible to repair cars and pay for other essentials like regular medication.”*<sup>3</sup>
- According to the ABS Survey conducted in November 2020, **paying household bills** was reported to be the most common use of the Coronavirus Supplement (67%).<sup>4</sup>

### Number of people affected

- Before it ceased on 1/4/21, **1.9 million** people were receiving the Coronavirus Supplement (**plus ~1.1 million children**), including almost **1.3 m people receiving unemployment payments** JobSeeker or Youth Allowance Other. APW estimates **56 percent of the total receiving CVS were women** and ACOSS estimates more than half a million people receiving JobSeeker & Youth Allowance Other (549,000) live in regional Australia<sup>5</sup>. Tables 1-5 provide more data.

### Concerns for children and families

- We are extremely concerned about the impact on families with more than 1 million children. Many of these where the youngest child is at least eight years old receive the JobSeeker payment rather than parenting payments. Growing up in poverty is simply bad for children. We have summarised the experience and evidence in our 2020 Fast Fact [Child Poverty in Australia](#). As [Professor Sharon Bessell at ANU](#) says *“children will wake up hungry, go to school hungry, and go to bed hungry. And based on our [research](#), they will be reluctant to tell anyone, because of a sense of shame and a desire not to further worry their parents.”*
- Research undertaken by the **ANU and published 20/4/21** alarmingly predicts that due to cuts in payments which took effect from 1/4/21, child poverty rates for single parent families will soar to 41% – more than double the rate during the peak of COVID-19 and higher than pre-pandemic levels. Poverty rates for children under 5 years of age in single parent families is expected to increase from 12% to 46%.<sup>6</sup>

- Responses to the National Council of Single Mothers & Their Children **550 Reasons to Smile** campaign elicited the following:

*“When the \$550 ends I dread living like before again. I dread the kids going without. I dread the hunger, and fear of homelessness.”*

*“I lost my job through no fault of my own through covid lockdown and will not get be getting it back unfortunately... without the CVS I would not be able to afford everyday living expenses and I am concerned about what will happen when it finishes...”*

## About Anti-Poverty Week

- *Anti-Poverty Week supports the Australian community to have an increased understanding of poverty and to take action collectively to end it. We are a diverse network of individuals and organisations who share this purpose and we focus our activity each year in the week around the United Nations Day for the Eradication of Poverty on 17 October.*
- Our key message is **Poverty exists. Poverty hurts us all. We can all do something about it.** It is one of hope, not despair. Since the bushfires and COVID-19 pandemic in 2020 we have been focusing on the need to keep income support payments above the poverty line as well as ensuring all Australians have a safe, affordable place to call home (and supporting the [Everybody's Home](#) campaign).
- See more at our website [www.antipovertyweek.org.au](http://www.antipovertyweek.org.au) including our 5 May JobSeeker and Poverty Briefing, or contact **Toni Wren, Executive Director** on [ed@antipovertyweek.org.au](mailto:ed@antipovertyweek.org.au) or 0405 705 442.
